

Mathematik 8 II/III | Lineare Gleichungen

$$3x(x - 6) = 3x^2 - (10x + 1)$$

$$-2,4m + 2 \cdot 0,5 + m = 0,6m$$

Mathematik 8 II/III | Lineare Gleichungen (2)

$$4x + 7 - 2x = 3x + 2$$

$$2(x + 3) + 4x = 3(x - 2) + 5$$
